

Several spaces equal one. Front spaces are ignored.

An empty line starts a new paragraph.

A `\par` command does the same. It means that, you can use `\verb| |` to stop the execution of command, and simply print that

You can not type the `#`, `{`, `*`, `}`, `^` directly. You need to use `\{ \}` `\*`, `\^{}` to enable the `{`, `}`, `^`, etc.

For ligatures.

`It's difficult to find \ldots\It's dif{f}icult to f{}ind \ldots{}`  
will outputs It's difficult to find ...

It's difficult to find ...
